Professional Summary

Versatile Senior Software Engineer with 7 years of full stack experience building high-throughput web systems. Specialized in React, Node.js, TypeScript, PostgreSQL, and cloud architecture on AWS.

Work Experience

Lead Engineer - CloudScale Technologies (2021 - Present)

- Architected distributed REST APIs in Node.js and TypeScript handling 5,000,000 requests per day.
- Reduced infrastructure latency by 38% and cut cloud compute expenses by 65,000 dollars per year.
- Spearheaded transition to Docker containers and Kubernetes clusters, improving deployment frequency.
- Mentored 6 software engineers and managed Agile sprint planning and code reviews.

Software Engineer - DataForge Labs (2018 - 2021)

- Built responsive frontend interfaces using React and Redux supporting 150,000 active monthly users.
- Optimized PostgreSQL database queries, reducing average query execution times by 52%.
- Implemented automated testing using Jest and CI/CD pipelines with GitHub Actions.

Education

Bachelor of Science in Computer Science - University of California, Berkeley

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, HTML/CSS

Frameworks: React, Node.js, Express.js, Next.js, Redux

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Git, GitHub Actions

Databases: PostgreSQL, Redis, MongoDB
